## **Christie Clinic Upgrades Skin Treatments**

New technology expands, enhances anti-aging treatments

CHAMPAIGN, ILLINOIS—Enhanced skin treatment technology at Christie Clinic lets men and women alike start the year off right, with younger, healthier looking skin.

Rejuvenate skin and improve texture, tone, and tightness with Christie Clinic's newest advancements. The latest upgrades to Christie Clinic's state-of-the-art equipment let the Department of Dermatology provide faster, more precise treatments.

With the enhanced Titan<sup>®</sup> laser skin treatment system, physicians help restore skin appearance faster than ever before. The system treats three layers of the skin with light-based technology to reduce wrinkles, redness, brown spots, enlarged pores, or crepe-like skin quality.

Physicians can also use laser and light-based technology to more quickly remove unwanted hair and help reduce regrowth, eliminating the need for waxing, shaving, or tweezing.

New treatments like thread lifts give Christie Clinic additional ways to help patients enhance their natural beauty by minimizing the appearance of fine lines and improving facial skin firmness.

With these latest advancements, Christie Clinic's anti-aging services now include:

Light- and laser-based skin treatment

Noninvasive hair removal

Thread lifts for firmer-looking skin

Vascular therapy for unsightly veins

Christie Clinic has provided health care to the residents of central Illinois for over 75 years. It is the oldest multi-specialty medical group practice in central Illinois. Christie Clinic has clinics on University Avenue and Windsor Road in Champaign; CU Sleep in Champaign; satellite clinics in Danville, Mahomet, Rantoul, and Tuscola; and is planning an additional facility in Urbana. For more information about Christie Clinic, call 217-366-5218, or go to [www.christieclinic.com](http://www.christieclinic.com).
