

DIAMOND CONNECTION™

delivers inventory and service tracking expertise at your fingertips.

Using bar code scanning technology, **Diamond Connection** tracks daily parts inventory requirements by part number, description, bin location and cost.

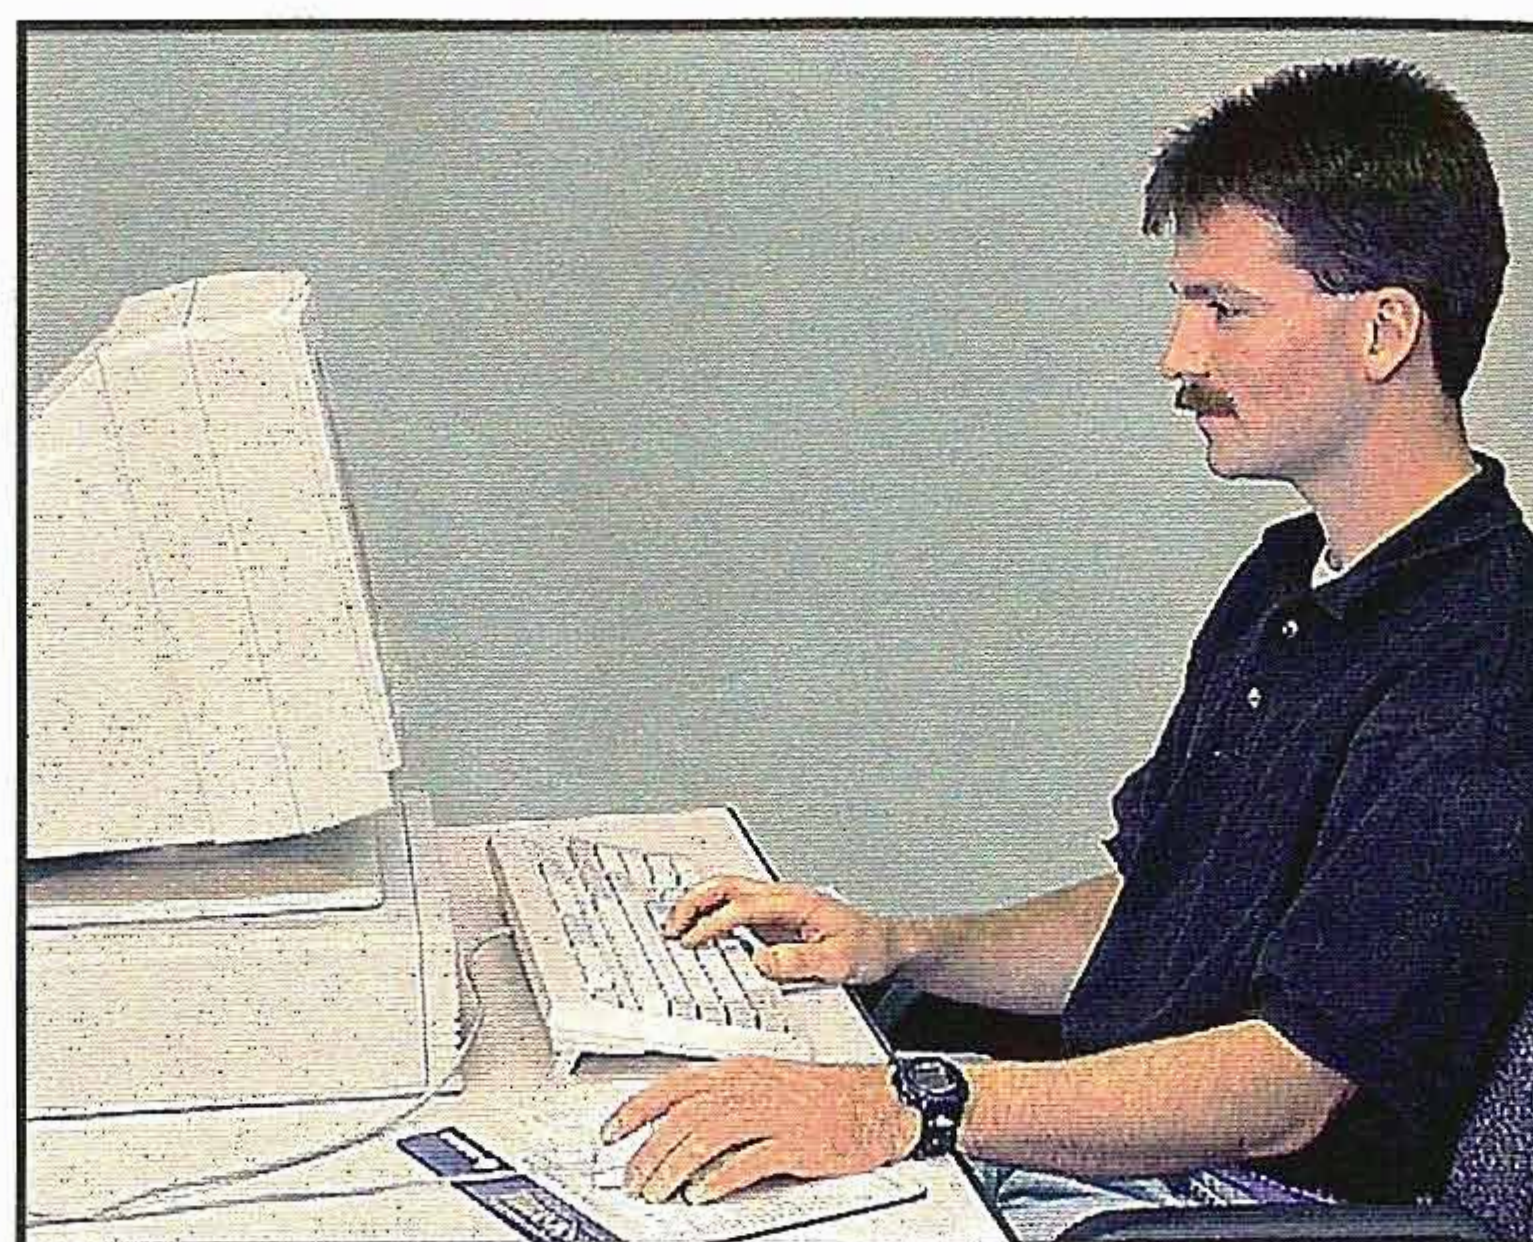

Diamond Connection allows you to assign preventive maintenance (PM), along with appropriate part numbers, directly to a job order. Each night, it identifies your replenishment needs directly to your International® dealer.

Your International dealer and **Diamond Connection** can fulfill your needs not only for the International bus but also for a variety of all-makes part requirements, such as filters, replacement stop arms and other safety equipment.

DIAMOND CONNECTION™

software works on the time-proven Microsoft Windows 95 operating system. For specific system package information, call your local International dealer.

Diamond Connection is a service program from International, the leading producer of school bus chassis in North America.

Keep your buses on the road.

Manage your maintenance, service and parts inventory with **Diamond Connection**. Call your International dealer today.

For the location of your nearest International dealer, call 1-800-448-7825.

Parts Inventory and
Service Tracking**

INTERNATIONAL®

DELIVERING. BEYOND THE EXPECTED.™

MIS 588R1

INTERNATIONAL®

DELIVERING. BEYOND THE EXPECTED.™

EASY TO USE

Launching **Diamond Connection™** at your location is simple. Contact your local International® dealer, and together you'll:

- ◆ Order system and software
- ◆ Organize and count existing inventory
- ◆ Enter counts, descriptions and costs into **Diamond Connection**
- ◆ Print bar code labels for each part and bin location — you're ready to go!

Daily, your employees simply scan bar codes as they take parts from inventory. At 2 a.m., **Diamond Connection** identifies your replenishment needs and transmits them to your International dealer. With your approval, your new order arrives with bar codes attached. Scan the bar codes to enter them into your inventory.

FOCUS ON PUPIL TRANSPORT, NOT BUS MAINTENANCE TASKS

Diamond Connection allows you to schedule preventive maintenance and job orders. It also manages your bus fleet's maintenance, repair and parts inventory — on time and on budget, to keep the buses moving.

Diamond Connection supports your bus safety initiatives by:

Delivering a preventive maintenance schedule by bus to:

- ◆ Ensure parts availability
- ◆ Record bus maintenance and repairs
- ◆ Identify potential training needs based on documented repair activity

Creating PM reports to help you meet state-mandated programs.

Keeping you informed on the repair and maintenance history of the entire fleet.

Eliminate routine and time-consuming inventory management tasks by:

- ◆ Developing accurate inventory records
- ◆ Reducing inventory carrying costs
- ◆ Ending bus downtime associated with parts stockouts
- ◆ Identifying slow-moving or dead inventory
- ◆ Reordering parts easily with a daily system-generated suggested parts order
- ◆ Eliminating redundant data entry

Generate accurate labor and parts expenditure reports by:

- ◆ Building long-term maintenance and service histories by bus and Vehicle Identification Number (VIN)
- ◆ Assigning ATA/VMRS codes
- ◆ Tracking repair costs (parts and labor) per bus for any time period
