

"Our family portrait gets bigger every year."

— The Holsteins

Now that the Holsteins have incorporated Ener GII® Reproduction Formula into their diet, their family grows faster every year. That's because Ener GII® Reproduction Formula's unique blend of rumen-protected palm fatty acids and omega-3 fatty acids helps keep cows bred by providing the fatty acids required to support healthy embryo growth. Plus, the omega-3 fatty acids in Ener GII® Reproduction Formula help maintain normal reproductive performance by balancing prostaglandin levels in bred cows, and that can help sustain pregnancies. Which translates into more cows and growing family portraits. Now that's a family tradition you can't afford not to invest in.

To grow your family, call 800-225-4519, or contact us at www.dairy1to1.com to find out more about Ener GII® Reproduction Formula.
